

SECTION 4. LODGING

In addition to the measures listed in Section 1 All Businesses, additional measures have been identified for specific industry sectors and specific business types. Employers within this Industry should implement the following additional measures:

A. Training: No additional measures. See Section 1.

B. Signage: No additional measures. See Section 1.

C. Measures to Protect Employee Health: No additional measures. See Section 1.

D. Measures to Prevent Crowds from Gathering / Encourage Physical Distancing:

- i. Eliminate buffet style breakfasts where self-service is required.
- ii. Discourage use of lounge and other common areas where 6 foot physical distancing cannot be maintained between parties.
- iii. Encourage to-go service, where applicable.
- iv. Control physical distancing of people consuming food and beverage by limiting at-bar service, separating dining tables and restricting table use to keep household parties separated from others by a minimum of 6 feet.

E. Measures to Prevent Unnecessary Hand Contact / Increase Sanitization / Disinfection:

- i. Do not allow customers to sit or stand within 6 feet of food, glassware, consumables, or other materials that will be provided to other customers. In bar situations, if 6 feet of separation from such materials is not possible, install Plexiglas or other smooth and easily cleanable shielding materials to prevent contamination.
- ii. Continue to rotate rooms such that the longest possible period of time between occupants is provided.
- iii. Remove items that are strictly for convenience of guests (e.g. hair dryers, coffee makers, etc.), particularly in hotel rooms, if those will not be disinfected after each guest's stay ends.
- iv. High touch items such as TV remote controls, alarm clocks, and other convenience items that cannot be removed should be disinfected:
 1. Daily, if stayover service is provided.
 2. Between guests for all other situations.

Note: Normal cleaning may be appropriate, as opposed to disinfecting, if the room or lodging has been vacant (empty) for more than 7 days.

- v. Provide in-room sanitizer and hand wipes to all guests.

F. Additional Measures to Protect Health:

- i. Launder items (where possible) according to the manufacturer's instructions, using the warmest appropriate water setting and dry items completely. Or, disinfect items with an EPA-registered household disinfectant.

- ii. Do not shake dirty laundry as it may increase the possibility of dispersing the virus through the air.
- iii. Clean and disinfect hampers or other carts used for transporting laundry.
- iv. Ask guests how they are feeling when they check out. If they are complaining of COVID-19 symptoms, follow your detailed plans for cleaning and disinfecting the room they used.
